GFF Gingerbread House Pattern **(directions)** Prints on 8.5" x 11" plain paper.

DIRECTIONS:

Step 1: Print and cut out all the pieces on this document.

Step 2: Roll out Gingerbread Cookie dough (recipe at gffmag.com) to 1/4-inch thickness. Lay the cut out pattern pieces over the dough and trace them with a knife to create dough pieces in the correct shapes.

Step 3: Bake as indicated in the recipe.

CONSTRUCTION

You will need gingerbread cookie dough (recipe at gffmag.com), a pastry bag of Royal Icing (recipe at gffmag.com), and your choice of candy, colored icing, or both.

Step 1: On a platter or dry surface, stand the cookie shape A up facing you. Add shape B (the left side) and shape C (back) so they form 3 sides of the house. Make sure the roof pitch of the back of the house matches the front. Fuse the edges together using Royal Icing and let dry.

Step 2: Stand up cookie shape D lengthwise with the slanted end up and, using Royal Icing, adhere it to the right front side of the house so the flat side of the cookie is parallel to cookie shape B.

Step 3: Finish the front of the house; Using icing, adhere cookie shape E, slanted edge up, to the back edge of Shape D so that the flat side of shape E faces the same direction as shape A.

Step 4: With Royal Icing, adhere the right exterior side wall (shape F). Let dry.

Step 5: Use the icing to attach the roof pieces; place shape G on top of the left side of the house and shape H over the right side.

Step 6: Once the house is dry, decorate with candy!
